SUMMARY

Detail-oriented Application Support Engineer with 2 years of experience in backend troubleshooting, system analysis, and technical support. Skilled in resolving escalated application issues, performing root cause analysis, and ensuring system stability across production environments. Proficient in querying databases using PgAdmin4 (PostgreSQL) and Microsoft SQL Server, analyzing logs via Git Bash, and monitoring performance with Dynatrace. Experienced in developing automation workflows using Microsoft Power Automate, Bash scripting, PowerShell, and batch scripting to streamline operations and improve efficiency. Comfortable working in Linux environments, with hands-on experience in command-line operations and system diagnostics. Committed to continuous learning, effective collaboration, and delivering reliable solutions in fast-paced environments.

EDUCATION

Mapua University, Manila
2018 - 2022

BACHELOR'S OF SCIENCE IN MECHANICAL ENGINEERING

- Half academic scholarship
- Won Best Thesis Presentation

WORK EXPERIENCE

HCL TECH
Jan, 2025 - Present

L2 APPLICATION SUPPORT ENGINEER

- Delivered advanced technical support for enterprise applications, resolving issues escalated from L1 support with a focus on backend systems and infrastructure.
- Monitored application health and backend performance using Dynatrace, proactively identifying anomalies and optimizing system uptime.
- Analyzed backend logs and system environments using Git Bash, executing shell commands to troubleshoot and resolve critical issues.
- Queried and searched data using PgAdmin4 (PostgreSQL) and Microsoft SQL Server to investigate application behavior and support issue resolution.
- Participated in application release cycles, change management, and post-deployment validation to ensure reliability.
- Ensured adherence to SLA and ITIL standards for incident, problem, and change management processes.
- Handled side tasks involving Microsoft Power Automate, contributing to workflow integration and automation to improve operational efficiency.

ACCENTURE, INC.
June, 2023 - Dec, 2024

SOFTWARE ENGINEER

- Diagnose and resolve complex technical issues, delivering comprehensive root cause analyses and implementing corrective actions to minimize downtime.
- Oversee and execute the system migration plans, including upgrades and patching, to enhance system capabilities and maintain security.
- Monitor server performances, health and security using various tools and dashboards.

ACCENTURE, INC.
Jan, 2023 - June, 2023

GL TESTER

- Executed functional testing for General Ledger (GL) scope within financial systems.
- Developed and maintained test cases and test scripts for GL functionality.
- Identified, documented, and reported software defects.

SKILLS

PROFESSIONAL

- Attention to Detail
- Conflict Resolution
- Team Collaboration
- Continuous Learning
- Accountability
- Critical Thinking
- Time Management
- Adaptability

TECHNICAL

- **Programming & Scripting**

Python, R, Bash, Batch, Shell Scripting, PowerShell, MATLAB

- **Database & Query Tools**

Microsoft SQL Server, Oracle SQL Developer, PostgreSQL (PgAdmin4), Oracle

- **Monitoring & Logging**

Dynatrace, Splunk

- **Automation & CI/CD**

Microsoft Power Automate, Jenkins

- **Containerization & Orchestration**

Kubernetes

- **Application & System Support**

PeopleSoft, SimpleCRM, RemedyForce
Ticketing Systems: Jira, ServiceNow, Confluence

- **Development Tools & IDEs**

Visual Studio Code (VS Code), Git Bash, Notepad++

- **Operating Systems & Environments**

Linux, Windows

- **API & Integration Tools**

Postman

PROJECTS

JAVA PATCHING AUTOMATION FOR NON-PROD AND PROD ENVIRONMENTS

Tools: *Jenkins, Bash Scripting*

- Automated the patching process of Java across both non-production and production environments.
- Developed Jenkins pipelines integrated with Bash scripts to streamline patch deployment.
- Reduced manual effort, minimized downtime, and ensured consistent patching across environments.

BACKEND MONITORING

Tools: *Splunk, Linux, Powershell, Bash Scripting*

- Used Linux to deploy Bash scripts and Windows to deploy batch and PowerShell scripts to automate log collection and alerting processes.
- Developed a structured approach for investigating backend application issues using Splunk and log analysis.
- Used Linux to deploy Bash scripts and Windows to deploy batch and PowerShell scripts to automate log collection, report generation, and alerting processes.
